SUMMARY

In this manual, some of the features on different views are listed and explained.

Specifically certain input field expectations are noted and should be considered.

Additionally, the live application URL and existing member credentials are shared; however, these are subject to change.

GitHub URL

FEAT application GitHub repository URL: <https://github.com/heobu/swe573>

Wiki page: <https://github.com/heobu/swe573/wiki>

Current application is running from the default “dev” branch.

Application URL

FEAT application can be reached at [this](#) address.

URL: <http://ec2-54-147-89-156.compute-1.amazonaws.com:8000/>

Login Credentials

Following are the user credentials for the existing members in the system:

Consumer User:

Username: Consumer1

Password: pass0987

Provider User:

Username: Provider1

Password: pass0987

VIEWS AND FEATURES

Register View

Password: Django's password rules should be followed in order to register a new member.

Register as Consumer:

Date of Birth for a Consumer user should be entered in the YYYY-MM-DD format.

Example: 2001-10-10

Register as Provider:

Text should be entered for the Location field.

Create a Recipe

A menu consists of ingredients with a given amount of chosen unit.

Difficulty: An integer value from 1 to 5 (included).

Prepared in: The time it takes to create a recipe in minutes.

Image link: Provide a link for an image. This is optional.

Ingredients can be added and removed from the ingredients list before the recipe is finalized.

If a particular ingredient does not have an appropriate measurement unit, that ingredient may be excluded and ignored in the recipe creation.

Create a Menu

A menu consists of recipes.

Image link: Provide a link for an image. This is optional.

Recipes that can be included in a menu are listed in the menu creation page. When the user clicks on one of the recipes in the list, it will be added as a food item. **Do not change items in the food item field randomly!**
